DETAILED ACTION

1. This office action is in response to application 10/660,016 and amendment filed on 10/24/2002. Claims 7-13 and 20-26 remain pending in the application after cancellation of claims 1-6, 14-19 and 27-34.

EXAMINER'S STATEMENT AS TO THE REASONS FOR ALLOWANCE

2. Claims 7-13 and 20-26 are allowed over the prior art of record.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a method for correcting antenna violations in high-density integrated circuits and an integrated circuit design produced by the method comprising the following steps of interpreting an integrated circuit error report to obtain error coordinates; then determining a cell of the integrated circuit based on the error coordinates just identified and a design exchange format file; then determining error position within the cell just determined based on the error coordinates; then an affected input of the cell is determined based on the error position just determined and a library exchange file; after, identifying an available charge protection element within a layout of high-density integrated circuits; and finally logically coupling the available charge protection element to the affected input of the cell just determined.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
